HAIRUN BIOLOGICAL

COMPANY PROFILE

TOP MESSAGE

Changsha Hairun Biotechnology Co., Ltd., established in 2008, is a Chinese biotechnology enterprise specialising in the development of medical devices for wound care and dermatology. Since its inception, the company has steadfastly pursued its mission: 'Driven by public health, advancing the frontier of dermatological development.' We firmly believe that the unresolved technical barriers in cutting-edge fields such as wound regenerative medicine and precision treatment for skin diseases represent precisely the breakthrough points through which we can propel industry progress. Guided by this conviction, we take pride in developing wound care products featuring high antimicrobial efficacy and low cytotoxicity. We are committed to providing comprehensive wound and dermatological treatment solutions for patients, safeguarding every glimmer of hope for life.

The company pioneered product lines incorporating silver, chitosan, hyaluronic acid, and silicone for wound care. Through continuous technological innovation, we have established significant advantages in niche markets including antimicrobial dressings, mucosal repair, skin barrier restoration, and scar treatment. Building upon this foundation, we have expanded into overseas markets, securing the first MDR product certification for an international skin barrier repair series, which has gained recognition from clients across Europe and the Middle East. Moving forward, Hairun Bio will continue to pioneer cutting-edge technologies in dermatology and wound care, driving medical advancement through innovation.

The company is equipped with a comprehensive range of advanced production facilities and high-precision automated production lines. Production management and quality control strictly adhere to the ISO 13485 standard, ensuring precise control at every stage from raw material input to finished product output. This guarantees the stability and consistency of product quality. The Class 100,000 clean production workshop effectively prevents contamination during manufacturing, providing a robust safeguard for product safety and reliability.

Changsha Hairun Biotechnology Co., Ltd. boasts a professional R&D team comprising seasoned experts and outstanding scientific researchers. Possessing extensive industry experience and an innovative spirit, they continuously explore cutting-edge knowledge within the biotechnology field. The company has established close collaborative relationships with multiple universities and research institutions, accelerating the translation of scientific achievements through an industry-academia-research integration model. In terms of R&D focus, the company concentrates on core areas of biotechnology, continually launching innovative and market-competitive products that provide effective solutions to industry challenges.

Our Business

We supply high-quality wound management products and skin care products to the medical industry.

Core contributions centre on three major product series: silver-containing antimicrobial dressings, medical scar management products, and medical hyaluronic acid skin barrier repair solutions. Through antimicrobial action, enhanced tissue repair, and reduced scar formation, these provide more effective solutions for patients with acute and chronic wounds, as well as for post-operative management in medical aesthetics.

All product lines offer OEM customisation services.

Antimicrobial protection for wounds

Mucosa ChitosanGel
(For Oral/ Perineal/ Anus mucosa care)

Gentle Care for Scars

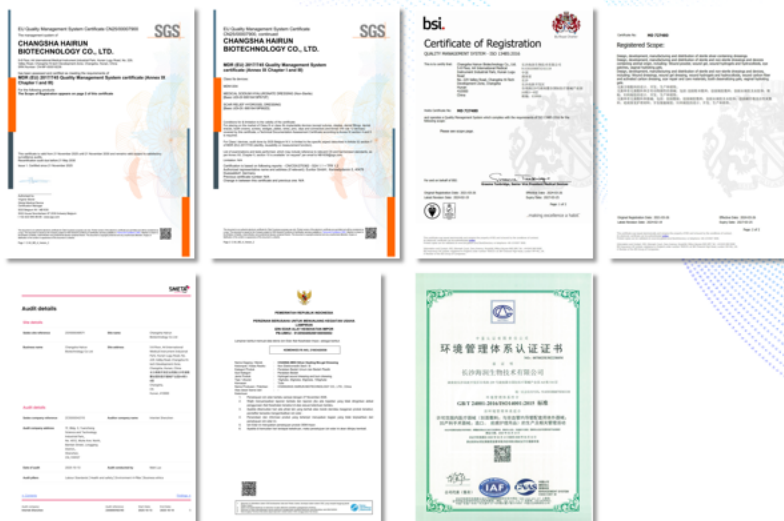

Rapid repair of the damaged skin barrier

Regulatory Compliance

Changsha Hairun Biotechnology Co., Ltd., a specialized supplier in the fields of medical dressings and skin repair solutions, consistently upholds regulatory compliance as the cornerstone of its operational philosophy. The company strictly conforms to international and local regulatory standards across its target markets, having proudly achieved ISO 13485 certification for its Medical Device Quality Management System. This accreditation ensures that every phase of the product lifecycle—from R&D to delivery—complies with the most rigorous industry benchmarks.

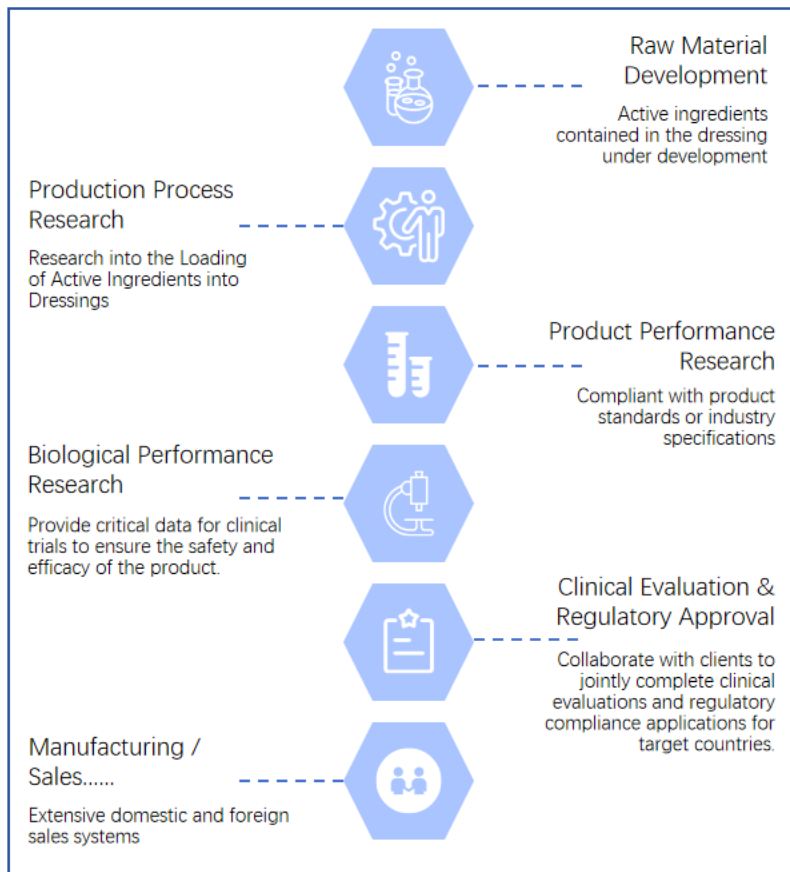

Moreover, the company has secured MDR certification, clearing the path for its products to enter the European market. Simultaneously, it has obtained product certifications from the Indonesian Ministry of Health and Saudi Food and Drug Authority, reinforcing its foothold in both Southeast Asian and Middle Eastern markets.

While relentlessly pursuing quality excellence, Changsha Hairun Biotechnology Co., Ltd. also actively honors its social responsibilities. It is a holder of ISO 14001 Environmental Management System certification, showcasing its unwavering dedication to environmental stewardship. Significantly, the company has successfully passed the SEDEX 4P global supply chain assessment, attesting to its transparency and sustainability in managing supply chain operations.

Our Development System

We carry out the whole process of R&D, raw material production and wound dressings manufacturing, clinical performance study, NMPA regulatory applications, manufacturing and marketing in-house. This has allowed us to build relationships of trust with researchers and key opinion leaders (KOLs), enabling speedy commercialization of products. We not only market reagents following commercialization but also market parts of raw materials and play a role as an OEM supplier.

Our manufacturing capabilities

Class 100,000 cleanrooms
and production facilities

General-purpose
laboratories + Specialist
laboratories

Core production equipment: Fully automated multi-functional dressing production equipment, emulsification and mixing equipment, filling and sealing equipment, automatic liquid filling equipment,

Academic Support & Links with KOLs

Symposiums:

Academic Annual Conference of the Burn Surgery Branch of the Chinese Medical Association:

Since 2009, we have participated in 16 annual conferences of this society, inviting domestic and overseas experts to engage in discussions.

Annual Conference of Burn Physicians of the Chinese Medical Doctor Association:

Since 2018, we have participated in seven annual conferences of this society and invited domestic wound repair experts to take part.

The Annual Conference of Aesthetic and Plastic Surgeons of the Chinese Medical Association:

Since 2022, we have participated in three annual conferences of this society and engaged in discussions on the topic of skin barrier repair.

Chinese Society for Biomaterials:

Hairun is an enterprise member of the Chinese Society for Biomaterials, participating in the research and development and transformation of new materials, and continuously promoting technological innovation in the field of wound repair.

1. Customer inquiry

2 Order confirmation

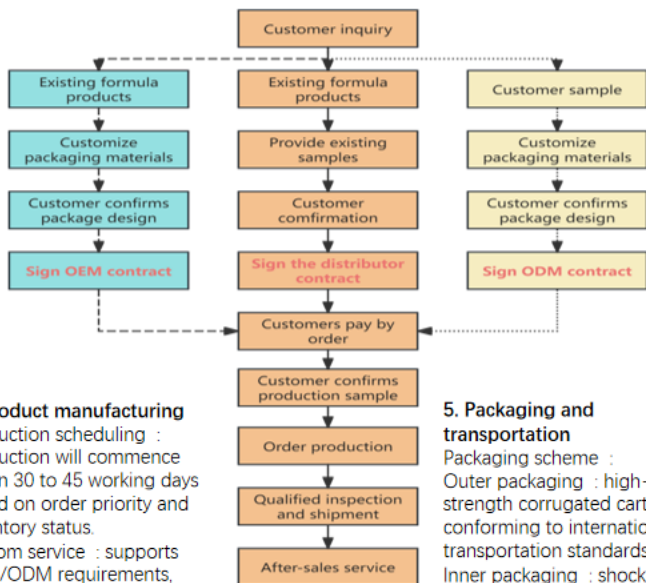

Key clause :

Minimum order quantity (MOQ) : customized by product type. Some products support small-batch trial orders.

Cost and packaging : A stepped quotation is provided. The packaging plan includes standard export boxes and customization options (such as brand LOGO printing).

Payment terms : multiple methods such as T/T, L/C are supported. The specific terms will be negotiated and confirmed by the sales representative with you.

Confirmation process : after both parties sign the purchase order (PO), the order officially takes effect.

3. Product manufacturing

Production scheduling : Production will commence within 30 to 45 working days based on order priority and inventory status.

Custom service : supports OEM/ODM requirements, including product design, function adjustment and packaging customization.

Progress update : Provide weekly production progress reports to ensure transparency.

4 Quality control

Inspection standard : Strictly follow the ISO 13485 quality management system

5. Packaging and transportation

Packaging scheme :
Outer packaging : high-strength corrugated carton, conforming to international transportation standards.
Inner packaging : shockproof material + product user manual (available in multiple languages).
Retail-friendly design : directly available for sale, brand labeling supported.

6. Logistics option :

Sea/air freight : flexible choice based on delivery time and cost requirements.

Customs clearance support :
